At a recent meeting of the Grayling Canoe Race Committee, it was decided that a budget of \$800 would finance the Grayling share of the race. Cost of this amount goes into the prize fund for canoe races.

To reach this figure, the committee is being asked to contribute as individuals and businesses. If the needed finances are raised, the Grayling committee will be a part in this year's race. The money can not be raised unless the committee has returned their money and the matter will be dropped.

Tom Welsh has been added to the committee which now numbers eight volunteers seeking to remove the race in the absence of the Chamber of Commerce, which formerly sponsored the event.

SMALL PRICE TO PAY . . .

The price control idea dies hard, even though exhaustive experience no less than enlightened economic theory has proven it to be both dangerous and ineffective.

As an example, an official of OPS predicted that the removal of controls will cost us at least \$3,000,000,000 a year in higher prices. That forecast certainly hasn't been born out — at this writing the cost-of-living index is down a fraction.

However, regardless of what prices do in the future, this observation from a New York Times editorial is completely valid: "Even if one accepts the figure of \$3,000,000,000 for discussion's sake, that is less than one per cent of our gross national product in 1952. This would hardly seem an excessive price for the greater flexibility gained through removal of controls." The Times went on to say that the forecast left out of account "such factors as the Government's savings from the removal of the need to employ price, wage and salary stabilizers, business men's gains from being freed of the necessity to maintain elaborate records, and the economy's gains from the stimulus to production felt in those fields where prices have gone or may go above former ceilings."

You can pass a law authorizing a government bureau to tell the manufacturer and retailer what he may charge for this product or that. But you can't make the manufacturer produce it, or the retailer stock it, if the price is too low to pay expenses and return a little profit. That's why price controls are a destructive factor all the way down the line, from the biggest manufacturer to the smallest store.

Next, take a good long look at its distinctive styling and its luxurious color-matched interiors.

Consider, also, Pontiac's reputation for unsurpassed dependability, long-range economy and high resale value.

Finally, compare its low price—so low, in fact, that if you can afford any new car you can afford a Pontiac. Why not come in and see for yourself?

constant high quality

With new high-octane POWER-FLIGHT gasoline, you'll get faster pick-up, more pep and power and more miles per gallon than ever before, because POWER-FLIGHT is made from selected crudes by a special platforming process in new \$2,000,000 facilities. And it comes to you fresh from refineries in Mt. Pleasant, Michigan.

In Roosevelt Oil and Refining Corporation's new \$2,000,000 refinery, selected crudes are refined into new high-octane POWER-FLIGHT gasoline by a process known as Platforming. Platforming is a catalytic reforming process in which the precious metal, platinum, is used to produce a reaction that greatly improves the octane rating of gasoline. And the new more powerful high-octane POWER-FLIGHT is one of the very few motor fuels made by this process.

Besides, gasoline shipped from far-away refineries will sometimes lose its energy and waste away its precious power in the long journey to Michigan. But POWER-FLIGHT is shipped direct to service stations from refineries in Mt. Pleasant, Michigan--and it goes to work in your car while it is still fresh and full of power. That's why you can be sure you're getting the best when you fill up with the new high-octane POWER-FLIGHT. For faster pick-up, more pep and power and more miles per gallon than ever before, drive in for a tankful of POWER-FLIGHT today--at the sign of the screaming rocket.

LOCAL NEWS

Rev. John Enselmann left Monday on a two weeks vacation trip, that will take him to Washington, D. C., and into the Virginias. He plans to visit relatives and friends in Washington.

There was a large number from Grayling in attendance at the Spring Band Festival in Gaylord, Tuesday of last week.

Townpeople in general and many others all over the state have been deeply concerned over George Griffith, following the freak accident that befell him on April 27th. However he returned home Thursday accompanied by Mrs. Griffith from Munson Hospital, Traverse City and has had the misfortune to lose the sight of his right eye, although the eye has been saved. He is in fine spirits and happy to be back home and among his friends. The accident happened on April 27th while he was fishing from a canoe in company with Conservation Officer Clarence Roberts. He had made a cast, but decided to reverse it and as the line flipped back the trout fly hooked into the pupil of his right eye. He was rushed to Munson Hospital by ambulance where the hook was removed and where he remained until coming home Thursday. Mr. Griffith is vice-chairman and a member of the Michigan State Conservation Commission.

Joseph Stripe, Principal of G. H. S. attended a principals conference in Gaylord Tuesday of last week and on Friday Miss Wanda Mikrut, Home Economics teacher attended a Home making meeting.

Mrs. Oscar W. Hanson had as her guest a couple of days last week her sister Mrs. Gordon Chamberlain of Ft. Lauderdale, Fla. Mrs. George Wiggins and children of Saginaw returned home Sunday after visiting her parents, Mr. and Mrs. Albert Knibbs for a few days.

I am at the Avalanche office on Thursdays and Fridays of each week if anyone desires to see or call me about insurance matters in connection with Palmer Insurance Agency on those days. At all other times I am at my home, 800 Michigan Ave. Nola Laurant, Agent.

Dr. and Mrs. C. R. Keyport and Dr. and Mrs. B. Elmore Henig are in attendance at the Wayne University College of Medicine Alumni day, being held at Wayne University in Detroit, yesterday and today.

Mrs. Leo Jorgenson and Mrs. Lillian Ryan attended the regular monthly meeting of the 8 et 40 of this district at Prudenville Thursday.

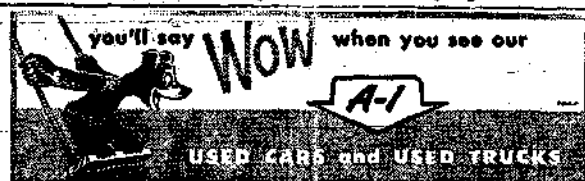

CARD OF THANKS
Many thanks to the Doctors, Sisters and Nurses for the good care I received while a patient at Mercy Hospital, and to my friends for their visits, cards and flowers.
Sincerely,
Don Weaver

OUR REPUTATION RIDES WITH EVERY USED CAR AND TRUCK WE SELL

Why America is swinging to Ford

MORE AND MORE PEOPLE ARE FINDING THAT FORD IS WORTH MORE WHEN THEY BUY... WORTH MORE WHEN THEY SELL... AND HERE'S WHY:

People all over the country are finding in Ford the beauty and engineering they expected to find only in the more expensive cars. They're finding beauty that "belongs" in any surroundings...

comfort that was formerly associated only with hard-to-park length. And a study of the used car market shows that Ford keeps its value better than any other car.

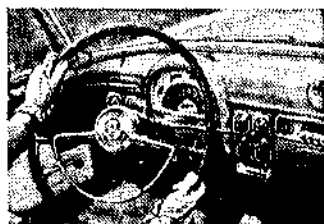

Ford's roomy interiors are handsomely styled in a wide variety of colors, all tastefully matched to exterior colors. And Ford's soft, foam rubber cushions over non-sag springs give you day-long driving comfort.

Center-fill fueling is another "Worth More" feature that's not found in the low-price field. It saves fill-up time and trouble... ends hose marks on fenders. The short fill pipe makes room for an extra suitcase in the trunk. Here's another reason Ford is the New Standard of the American Road.

Suspended clutch and brake pedals work easier and give more room. They turn the entire floor space into foot space. And they act as "no entrance" signs to drafts and dirt—make it easier to keep your Ford clean.

Ford Steering is easy on you! Makes handling a treat on highway or street. Wide front tread permits sharp turns for easier parking in small spaces. And Ford Full-Circle Visibility gives you clear vision in all directions.

Ford has a new, smoother ride. New, softer spring and shock absorber action plus new-design rubber compression bumpers reduce front-end road shock (the kind you feel most) up to 80%. Ford's wide front tread, low center of gravity and diagonally mounted rear shock absorbers help keep you level on curves.

Ford Economy Beats Them All!

A Ford Mileage Maker "6", with Overdrive, won the grand Sweepstakes Award in the 1953 Mobilgas Economy Run. For the first time in history, a low-priced car not only won in its class, but took top honors—the coveted Sweepstakes Award—for beating the entire field regardless of class, size or weight. Here's additional proof that Ford is America's greatest economy car.

YOUR MILK...

Fertile soil, the sun and rain. These three make life possible on this earth. Without their perfect co-operation, our labors would come to a standstill. Two nations with the largest populations in the world are China and India. Many of their people do not get the necessities of life. The life span in India is just about half of what it is in the United States, due to the low standard of living. When they are hit with a widespread and prolonged drought, thousands of people starve to death. There are three more nations with a large population for the size of their countries. They are Germany, Italy and Japan. These nations get a larger yield per acre than we do. However they just don't have enough space. Much of Japan is mountainous and unfit for agriculture. These conditions cause unrest among their people. They want better living conditions. Canada and much of South America as well as other places are underpopulated and could use millions of surplus people that must starve while the former countries have a vast haven, that needs people to open it up. Instead of wars which never did anyone any good, let's have co-operation among mankind. Surely it would be better than wasting what we have and killing one another. War has always failed, let us make up. Milk has been known to be a good food for ages and anything that keeps its reputation that long must be good. Call for Crawford County produced milk.
